## EDUCATION

### Bachelor of Science, Software Engineering

September 2023 - April 2028

Schulich School of Engineering, University of Calgary

- Courses: Networked Systems, Data Management, Embedded Software & Hardware Systems, Object-Oriented Programming, Data Structures & Algorithms, Full Stack Web Development, Computer Organization, Applied Operating Systems, C/C++, Machine Learning, Software Testing & Architecture, Software Performance Evaluation, Project Management
- Available for internships starting May 1, 2026

## CORE SKILLS

- Programming Languages: Python, Java, C, C++, C#, HTML, CSS, TailwindCSS, JavaScript, TypeScript, Rust, R
- Frameworks and Libraries: Junit, React, Flask
- Tools and Environments: Git, GitHub, Visual Studio, Linux OS, Eclipse, Node.js, Figma, Microsoft Office, Power BI, Unity, Selenium
- Databases: SQL, MySQL, PostgreSQL
- Soft Skills: Leadership, Team Player, Problem-Solving, Critical Thinking, Time Management

## PROJECTS

### Museum Database Management System

October 2024 - December 2024

- Collaborated in and led a team in the development of a relational database schema for managing museum exhibits and collections
- Created **SQL queries and interfaces** for efficient record entry, updates, and searches using **MySQL**

### Learning Management System Website

January 2025 – April 2025

- Collaborated with a partner to design and develop a full-stack Learning Management System using **HTML, CSS, JavaScript, Python & React**
- Developed user-friendly Login and Signup pages with **authentication** and a Quiz page with a **live timer**

### Flight Reservation System

November 2025 - December 2025

- Developed a **Java-based** flight reservation system enabling various users to manage flights, create accounts & process payments
- Integrated a **MySQL database using JDBC**, handling **user authentication** and flight data storage

### 3D Snakes and Ladders Game

February 2026 - March 2026

- Developed interactive UI components in **Unity/C#**, including a dynamic "Info Panel" that parses **JSON data**
- Enhanced **user engagement** by implementing "Learn More" and "Explanation" features, providing feedback

## EXPERIENCE

### Schulich Ignite, Calgary, Alberta

October 2024 - December 2024

- Mentored students in **Python programming** and provided guidance on concepts and in-session exercises
- Marked assignments, delivering constructive feedback to support students in learning and improving

### GoBabyGo, Calgary, Alberta

October 2024 - December 2024

- Working in a multidisciplinary team to help build a wheelchair for children with mobility disabilities
- Provided & developed code for the wheelchair remote to enable a hierarchy system for different **control modes in C**

### Summer Camp Counsellor

June 2025 - August 2025

Islamic Association of Northwest Calgary, Calgary, Alberta

- Planned, executed and led Islamic studies, team-building exercises and games catered to campers aged 13-18
- Customized a Stripe Checkout page with **Flask and Python** to handle camp payments from Jotform

### ReVOLT EV, Calgary, Alberta

September 2025 – present

- Collaborating with a multidisciplinary team to design and build an electric motorcycle for competitions
- Developing battery and temperature data logging on **Raspberry Pi, STM32 & ESP32** and utilizing **Python and C**
